## LOGO SCRATCH

working from your artwork, Goldcrest can further personalise your product with special designs, a company logo or a promotional image using silver or black scratch inks.

## SINGLE PIN SCRATCH

We can provide scratch off labels in all the standard sizes.

We would also be happy to quote for any size you want, in any quantity. Zebra, Leopard and Plain Silver are the most common designs of disruptive pattern but we can easily re-create any pattern you care to specify.

All our scratch labels are quality tested to give you the highest standard in opacity, scratch feel and quality, card adhesion and smooth machine application.

## HOLOGRAPHIC SCRATCH

The versatility of a label, combined with the extra security of a hologram and no need to buy extra equipment.

Ideal for high value or short term security issues.

## MULTI-PIN SCRATCH

Currently we have scratch off labels in 2,3,4 and 5 across designs.

We can do various label patterns and also available as a logo scratch product. Ask about our Broad Edge scratch labels the '1-up Solution to Multi-Label Problems'.

## ACTIVATION LABELS

Card activation instruction labels available in up to six colours.

Our ultra removable labels mean easy peel with no marking.

## EXTRA SECURE TWIN-LAYER SCRATCH

A delaminating imprintable bottom layer combined with a standard scratch label top gives you a two label sandwich, our most secure scratch system ever.

## COLOURED SCRATCH

Scratch off does not have to be black and grey! Why not be different and add a splash of colour?

We have scratch off ink in most colours, so be creative and make your product stand out from the crowd.
